## SUMMARY OF TABLES.

In 1902 there were received 48,320 applications for mechanical patents, 1,170 applications for design patents, 151 applications for reissues of patents, 2,602 applications for registration of trade-marks, 1,121 applications for registration of labels, and 266 applications for registration of prints. There were 27,776 patents issued, including designs, 110 patents reissued, 2,006 trade-marks registered, 767 labels, and 158 prints. The number of patents that expired was 23,331. The number of allowed applications awaiting the payment of final fees was 9,284.

The number that were forfeited for non-payment of the final fees was 4,471. The total expenditures were \$1,393,345.54. The receipts over expenditures were \$159,513.54. The total balance to the credit of the Patent Office in the Treasury of the United States on January 1, 1903, was \$5,488,954.61.

In proportion to population more patents were issued to citizens of the District of Columbia than to those of any of the States or Territories—one to every 1,080. Next in order are the following: Connecticut, 1 to every 1,240; Massachusetts, 1 to every 1,439; Rhode Island, 1 to every 1,558; New Jersey,

1 to every 1,605; Colorado, 1 to every 1,670; California, 1 to every 1,738; New York, 1 to every 1,764; Illinois, 1 to every 1,906; Pennsylvania, 1 to every 2,257; Ohio, 1 to every 2,271; Washington, 1 to every 2,712; Nevada, 1 to every 2,822; Michigan, 1 to every 3,119; Montana, 1 to every 3,244; Arizona Territory, 1 to every 3,615; Indiana, 1 to every 3,723; Maryland, 1 to every 3,814; Minnesota, 1 to every 3,926; Wisconsin, 1 to every 3,971; Missouri, 1 to every 4,039; Oregon, 1 to every 4,135; Iowa, 1 to every 4,203; Delaware, 1 to every 4,296; New Hampshire, 1 to every 4,378; Vermont, 1 to every 4,840; Nebraska, 1 to every 4,856; North Dakota, 1 to every 4,986; Maine, 1 to every 5,032; Kansas, 1 to every 5,308; Wyoming, 1 to every 6,168; Utah, 1 to every 6,289; Idaho, 1 to every 6,470; South Dakota, 1 to every 6,476; New Mexico Territory, 1 to every 7,812; West Virginia, 1 to every 8,057; Oklahoma Territory, 1 to every 8,296; Texas, 1 to every 8,515; Virginia, 1 to every 9,224; Kentucky, 1 to every 9,255; Florida, 1 to every 9,272; Tennessee, 1 to every 10,922; Alaska Territory, 1 to every 12,688. The fewest patents granted in proportion to the number of inhabitants were in the following States and Territories: South Carolina, 1 to every 29,137; Alabama, 1 to every 20,547; North Carolina, 1 to every 19,523; Mississippi, 1 to every 17,046; Arkansas, 1 to every 15,801; Louisiana, 1 to every 15,700; Indian Territory, 1 to every 15,678; Georgia, 1 to every 13,681; Hawaii Territory, 1 to every 12,833.

As to foreign patents, 1,000 were granted to residents of England; 956 to those of Germany; 392 to those of Canada; 346 to those of France; 132 to those of Austria-Hungary; 104 to those of Scotland; 78 to those of Switzerland; 63 to those of Sweden; 50 to those of Russia; 48 to those of New Zealand; 45 to those of Belgium; 39 to those of Italy; 36 to those of Victoria; 31 to those of Denmark; 28 to those of Ireland; 21 to those of New South Wales; 20 to those of Mexico; 17 to those of Norway; 16 to those of the Netherlands; 13 to those of South Australia; 10 to those of Cuba; Argentina, India, and Queensland, 5 each; Egypt and South African Republic, 4 each; Brazil, Cape Colony, China, and Spain, 3 each; Colombia, Japan, Natal, and Western Australia, 2 each; and Bahama Islands, Bermuda, Chile, Cocos Island, Newfoundland, Peru, Portugal, Roumania, Santo Domingo, Tasmania, and Uruguay, 1 each.

The Patent Office issued 27,886 patents during the year 1902, the largest annual issue in its entire history.

The total number of trade-marks, prints, and labels registered for the year 1902 was 2,931.

The condition of the Examining Divisions upon December 31 is indicated by the fact that of the thirty-eight divisions nineteen were then taking up new cases for action within one month from the date of filing, sixteen were in arrears between one and two months, two divisions between two and three months, and one division between three and four months. The total number of cases awaiting action on the part of the Office upon December 31 was 11,446.

The large increase in the volume of work transacted by this Bureau appears in the foregoing tables. It can be seen by them that the number of applications for mechanical patents exceeded by 4,347 the number of such applications received in the preceding year, an increase of approximately ten per cent. in this class of applications, which involves the most considerable work within this Office.

The operation of the new design patent law, which was approved upon the 9th day of May, 1902, has been to decrease by 1,191 the number of applications for design patents, for this law has operated, as it was intended to operate, to make clear the fact that mechanical devices of little importance unaccompanied by the development of new mechanical functions were not to be protected by design patents. These patents are now restricted to those ornamental characteristics of manufactured articles which were intended primarily to be the subject for the application of this law before its employment had been widened beyond its originally-intended scope.

The number of mechanical patents issued during the year 1902 is 27,136, exceeding by 1,578 the issue of such patents for the preceding year, which was then the largest number issued by this Office in any year. For the causes stated, which have resulted in the diminution of the number of applications filed for design patents, the number of such patents issued during the year was diminished by 1,094 from the number issued during the previous year. The number of patents reissued during the year was 110, making the total issue of these three classes of patents 27,886 for the year 1902, against 27,373, the corresponding figures for the preceding year. The number of certificates of registration of trade-marks was 2,006, an increase of 78. The number of certificates of registration of labels was 767, a reduction of 111 in such certificates. The number of prints for which certificates of registration were issued was 158, being one less in number than those of the preceding year, the total number of certificates of registration of all classes issued during the year 1902 being 2,931, this being 34 less than were issued during the preceding year.

In the work of handling this business it should be noticed that the class of mechanical patents which has increased so largely in numbers during the last year comprises those cases which involve the largest amount of work in their consideration. The increase of work indicated by the foregoing figures has been met in some degree by the increase in the number of Examiners which was provided in the appropriation bill for the year 1902-3. This bill provided for an increase of thirty-five Examiners of all grades and three clerks, and the additional force became available upon the first day of July, 1902. This increase of force has aided in the transaction of this increased business, and as the new Examiners will undoubtedly be more effective in the next year, by reason of experience, than they have been during the year 1902, it is hoped that

their efforts will enable the work to be kept in hand, although a natural increase should continue.

The increase of work referred to in relation to the examining corps of this Office has been accompanied by a corresponding increase in the attendant clerical work required, and as no increase of clerical force was provided corresponding to the increase in the force of Examiners, the clerical work of this Office has been more onerous than usual.

The work of the tribunals of this Office, other than the Examining Divisions, has been kept well in hand, and interference cases before the Examiner of Interferences and upon appeals therefrom have been disposed of in a shorter time than was hitherto considered possible, in spite of the increased volume of such work incident to the increase in the general volume of the business of the Office.

The work of classification of patents has progressed satisfactorily during the past year, and the results of this valuable system are now available to facilitate the examination of the question of novelty of inventions.

The duties of the Assignment Division of this Office are to record assignments of patents and inventions and to furnish manuscript copies of records of the Office when required. During the year 1902, 24,091 deeds were received for record, of which 22,838 were recorded. Copies of records were also made which included 16,576,150 words. The number of deeds received was 1,102 in excess of the number for the preceding year, and the number of words written in furnishing copies of records was 2,056,110 more than for the preceding year. These figures serve to indicate the rapid growth of this portion of the work of this Office.

There has been during the last year a very great reduction in the number of complaints of losses of money in this Office. The sums of money alleged to have been sent to the Patent Office and which were not received for the first eight months of the year 1901 were \$387.64. During the corresponding period of 1902 the corresponding sums amounted to \$8.20. This result followed changes which appeared necessary to be made in August, 1901, and

following these changes the alleged losses of the last four months of 1901 were only \$6, and during the same period in 1902 the amount was \$5.10, so that the complaints of losses during the year 1902 were only \$13.30, while the total receipts of the Office during this year were \$1,552,859.08. Since these complaints of losses include claims erroneously made, as well as claims for moneys lost in the mails, it is thought that all of the alleged losses are properly chargeable to these two causes and have not occurred within the Office.

During the last year section 4883 of the Revised Statutes was amended by act of Congress approved April 11, 1902, the change making it no longer necessary that patents should be signed by the Assistant Secretary of the Interior.

The appropriation of \$5,000 included in the appropriation bill of 1901-2 for the new steel stacks for the Scientific Library of this Office has been expended, and the \$2,500 provided for in the appropriation bill for the year 1902-3 will, it is expected, complete the installation of steel stacks for this purpose. This work has already increased the usefulness of this library and has added greatly to the safety of the books.

The sum of \$2,000 appropriated for the purchase of books and for the transportation of the publications of the Patent Office to foreign governments is insufficient for the purposes of this library, and it will add greatly to its usefulness as a working library for the Examiners of this Office, as well as for the public, if this appropriation can be increased, for which purpose an annual increase of \$2,000 was asked in the estimate for the year 1903-4. This increase will be needed unless this library is to become deficient for the purposes for which it is intended.

The growth of the business of this Office and the accumulation of its records point to the conclusion that more room is required and could be used to great advantage if it could be furnished for the purposes of this Bureau.

Respectfully submitted,

F. I. ALLEN,  
*Commissioner of Patents.*
